PROFESSIONAL SUMMARY

Final-year Electronic Network Design student with hands-on experience supporting large-scale device deployments, network equipment configuration, IP phone commissioning, hardware imaging, and technical troubleshooting. Strong foundation in routing and switching, IPv4 addressing and subnetting, VLANs, network security fundamentals, and packet analysis. Experienced working with Cisco switches and routers, coordinating field deployments, and maintaining accurate technical documentation. Seeking an entry-level opportunity in IT support, network engineering, IT infrastructure, or cybersecurity.

TECHNICAL SKILLS

Networking: Routing and switching, IPv4 addressing and subnetting, VLANs, DHCP, DNS, TCP/IP, LAN/WAN fundamentals

Tools & Platforms: Cisco Packet Tracer, Wireshark, Linux, Windows, n8n, Firebase, AWS fundamentals

Hardware: Cisco Catalyst 2960 switches, Cisco 4221 routers, IP phones, desktops, notebooks, peripheral devices

Programming: C/C++, SQL/MySQL, Python fundamentals

Security: Firewall concepts, ACLs, network segmentation, access control, SIEM and incident-response fundamentals

EXPERIENCE

Technical Intern | VSTECS KU Sdn. Bhd. | Kota Damansara, Selangor

Mar 2026 - Aug 2026

- Supported mass imaging, BIOS configuration, verification, and deployment preparation for more than 900 HP desktops, 300 HP notebooks, and 190 ASUS notebooks.
- Deployed teacher devices across schools in Putrajaya and Pahang under the MOE Peranti Guru Phase 2 project, including antivirus installation, asset labeling, device verification, and user handover documentation.
- Troubleshoot imaging failures, corrupted installations, BIOS and boot issues, and hardware problems; re-imaged and revalidated affected devices before release.
- Maintained deployment records, serial-number documentation, FAT/FPP/SPP files, and inventory checks to support project close-out and audit readiness.
- Collaborated with technical teams during multi-location deployments and supported cross-department document scanning, organization, and server filing.

Junior Technician | Wevo Technology Sdn. Bhd.

May 2022 - Sep 2022

- Configured and commissioned switches, routers, IP phones, and supporting software for new customer installations.
- Diagnosed and resolved hardware, software, and network connectivity issues, helping minimize service downtime.
- Coordinated with external vendors during network infrastructure planning and supported presentations, site surveys, and outstation project work.

IT Intern | Wevo Technology Sdn. Bhd.

Jan 2022 - Apr 2022

- Assisted with installing, configuring, and testing switches, routers, IP phones, and end-user equipment for commissioning projects.
- Supported troubleshooting of common hardware, software, and connectivity problems and documented completed technical work.

EDUCATION

Bachelor of Electronic Engineering Technology (Electronic Network Design) with Honours Universiti Malaysia Perlis (UniMAP) Arau, Perlis CGPA: 3.47 Dean's List: Semesters 1, 2 and 4	Oct 2022 - Oct 2026
Diploma in Engineering (Computer Engineering) Universiti Malaysia Perlis (UniMAP) Arau, Perlis CGPA: 3.14	Jun 2019 - Jun 2022

SELECTED PROJECTS

AI-Powered Automated Social Media Content Scheduler Final Year Project • Developed an end-to-end n8n automation system that generates, schedules, and publishes content across X, Threads, YouTube Shorts, and Telegram using APIs, conditional logic, parallel workflows, and centralized error handling. • Built a Telegram AI chatbot with text and voice interaction for content management, image generation and editing, and real-time system notifications.	Mar 2025 - Feb 2026
Oyster Mushroom Farm Monitoring System Group Design Project • Designed an ESP32-based IoT system integrating temperature, humidity, CO2, light, and water-level sensors with automated relay control. • Developed a Firebase dashboard and Telegram alert bot for remote monitoring, cloud data logging, and system notifications.	Mar 2025 - Jul 2025
PID Control System Simulator Diploma Final Year Project • Developed a MATLAB GUI simulator for PID step-response and impulse-response visualization and implemented Ziegler-Nichols tuning calculations. • Tested controller inputs and transfer-function processing to verify rise time, overshoot, settling time, and steady-state error results.	Jul 2021 - Dec 2021

CERTIFICATIONS & TRAINING

- Google Cybersecurity Professional Certificate - In progress (expected Aug 2026)
- Enterprise Networking, Security, and Automation - Cisco Networking Academy (Jan 2026)
- Junior Cybersecurity Analyst Career Path - Cisco Networking Academy (Jan 2026)
- Cybersecurity Essentials - Cisco Networking Academy (Jan 2026)
- Introduction to Cybersecurity - Cisco Networking Academy (Oct 2025)
- Switching, Routing, and Wireless Essentials - Cisco Networking Academy (Jul 2024)
- Introduction to Networks - Cisco Networking Academy (Mar 2023)

AWARDS

- Gold Medal and Best Award, X-CIPTA 2025 - Oyster Mushroom Farm Monitoring System (Oct 2025)
- Gold Medal, IDPEX 2025 - Oyster Mushroom Farm Monitoring System (Jul 2025)

ADDITIONAL INFORMATION

Languages: Malay (Native), English (Intermediate)
Strengths: Problem solving, teamwork, adaptability, communication, attention to detail
